Sync Grip Puller Promo

Enerpac Products

Created 10.01.17 Expires 12.31.18

**10%
off**

The synchronized jaws on the new Enerpac Sync Grip Puller make it the easiest puller to operate.

SGM147SET

\$504.00

Sync Grip Puller Set
Contains 1, 4, & 7 Ton Pullers
FREE Case

Sync Grip Puller Set

Simple

- Synchronized movement of all three jaws makes positioning the puller simple and helps prevent misalignment

Safe

- No need to cut, heat, or torch components that need to be removed
- Prevents damage to parts being removed or other components in the assembly

Productive

- More controlled, higher force pull
- Set up is quicker and easier

Kit Includes

SGM147SET				
Puller Capacity (ton)	Puller Model No.	Max. Reach	Max. Spread	Weight (lbs)
1	SGM01	4.13	4.33	1.8
4	SGM04	7.28	6.89	4.4
7	SGM07	8.86	9.45	14.3

Other New Products from Enerpac

Ultra-Flat Hydraulic Cylinders

Enerpac introduces two new series of Ultra-Flat hydraulic cylinders. Nitrocarburized surface treatment inside and out provides unparalleled sideload resistance and corrosion protection for safe use in the harshest conditions. The Ultra-Flat cylinders are designed for applications where high lifting forces are required in confined spaces starting at 1.1 inch.

CULP-Series (10-55 ton) are equipped with an internal stop ring that prevents the plunger from accidentally dropping out at the end of its stroke.

The tilting plunger of CUSP-Series (10-1000 ton) enables adjustment and equal distribution of load over its full surface. Even at maximum tilted position, most models will have a straight lifting stroke of 0.4 inch. A "Red Line" will give the operator a visual indication when the maximum stroke has been reached.

Multi-stage Telescopic Hydraulic Cylinders

Enerpac introduces a new series of Multi-stage, Telescopic hydraulic cylinders. Nitrocarburized surface treatment inside and out provides unparalleled sideload resistance and corrosion protection for safe use in the harshest conditions. A new, longer stroke length means you can move a load a greater distance and eliminate the use of temporary cribbing.

Capacity: 15 – 35 tons
Stroke: 10.6 – 23.6 inches

High Tonnage Cylinders

New High Tonnage Cylinders are designed to provide superior durability and side-load (eccentric load) protection. A wide range of new features will help maintain stability, increase wear resistance and corrosion protection and provide longer service life. Features include Nitrocarburization surface treatment and increased side-load protection from upgraded bearing material.

Trade-In & Trade-Up Promotion

Upgrade your equipment and get the benefit of more efficiency, safety, and reliability that the Enerpac range provides. Trade-In your old Hydraulic Hand Pumps, ZU4-Series Electric Pumps, Cylinders or even Hand Pump/Cylinder sets and Trade-Up to Enerpac with Bond Fluidaire, your Enerpac sales partner.

See (<https://www.enerpac.com/en-us/news/trade-in-trade-up>) for details.

 **Competitive Trade-In**

Trade-in your Competitive branded tools for \$100 to \$200 off a brand new Enerpac or Simplex tool!

Present to Bond Fluidaire.
Valid 12.01.2017 through 12.31.2018.
May be used on any quantity of product.

 **Loyalty Trade-In**

Trade-in your Enerpac or Simplex tools for \$50 to \$100 off a brand new Enerpac or Simplex tool!

Present to Bond Fluidaire.
Valid 12.01.2017 through 12.31.2018.
May be used on any quantity of product.
